Coordinators:

The fifth edition of the workshop aims at improving students' communication skills in medical settings.

To do that, we invite workshop participants to present medical topics in English, French, German, or Romanian language. The topics may be extremely varied, from case studies, medical investigations, diseases, taking a history, doctor – patient dialogues, doctor – doctor dialogues, clinical procedures, surgical treatment and many others.

Students may also prepare posters for a poster session, which will accompany the presentation session.
